Fri, Oct 20, 2023 at 8:16 PM

Greetings,

This is a reminder of the meeting this Wednesday, October 25, 2023. The meeting is at the Post 113 located at [22 W. Broadway Ave, Meridian](#). The guest speaker this month will be John Kemkamp, WB4YJT. He will be talking to us about the Nano VNA, or vector Network Analyzer. This is especially useful for those who want to examine their antennas in a comprehensive manner and ensure there a good match for your transmitter. John wanted everyone to know that he will be describing and offering a very useful spreadsheet for use with the VNA.

Also, we will be expanding more on our long-range plans which in this case involves the Barbara Morgan Stem Academy in Meridian.

Finally, we will continue gathering member forms and talk about officers for next year.

Come join us for Pizza at 6:45 PM and the meeting at 7:00 PM.
